

Methodology: ImmunoCAP
Performed: Monday - Friday
Reported: 2 – 3 days

Specimen required:

Collect: One 6 mL SST. (min 4 mL)
Transport: 0.25 mL serum at 2 – 8 C. (Min; 0.1 mL/allergen)
Pediatric Collection/Transport: 0.2 mL serum at 2 – 8 C. (min 0.1 mL/allergen)
Remarks: Separate serum from cells ASAP.
Unacceptable Conditions: Hemolyzed, icteric or lipemic samples
Stability: After separation from clot: Ambient; 2 days: Refrigerate; 2 weeks: Frozen 1 year

Reference Interval:

Class 00: <0.35 kU/L absent or undetectable
 Class 01: 0.35-0.70 kU/L low
 Class 02: 0.71-3.50 kU/L moderate
 Class 03: 3.51-17.50 kU/L high
 Class 04: 17.51-50.0 kU/L very high
 Class 05: 50.01-100.0 kU/L very high
 Class 06:>100.0 kU/L very high

Interpretive data: Results with allergens scoring in Class 1 should be considered weakly positive or equivocal. Class 2 and higher should be considered positive. Although increasing class ranges (01-06) are reflective of increasing concentrations of allergen specific IgE, this may not correlate with the degree of clinical response when challenged with the specific allergen. The correlation of allergy laboratory results with clinical history is essential. A negative test may not rule out clinical allergy.

CPT Code(s): 86003

0055420 Yellow-Faced Hornet (IgG)

0055410 Yellow Jacket Venom (IgG)

Allergens, Profiles/Panels / IgE Specific

Methodology: ImmunoCAP

Performed: Mon-Fri

Reported: 2 – 3 days

Specimen Required:

Collect: One 6 mL SST.

Transport: 0.25 mL serum at 2-8°C. (Min: 0.1 mL/allergen)

Remarks: Separate serum from cells ASAP.

Unacceptable conditions: Hemolyzed, icteric, or lipemic samples.

Stability: After separation from clot: Ambient: 2 days; Refrigerated: 2 weeks; Frozen: 1 year

Reference Interval: Class 00: <0.35 kU/L Absent or undetectable

Class 01: 0.35-0.70 kU/L Low

Class 02: 0.71-3.50 kU/L Moderate

Class 03: 3.51-17.50 kU/L High

Class 04: 17.51-50.00 kU/L Very High

Class 05: 50.01-100.00 kU/L Very High

Class 06: >100.00 kU/L Very High

Interpretive Data: Results with allergens scoring in Class 1 should be considered weakly positive or equivocal. Class 2 and higher should be considered positive. Although increasing class ranges (01-06) are reflective of increasing concentrations of allergen specific IgE, this may not correlate with the degree of clinical response when challenged with the specific allergen. The correlation of allergy laboratory results with clinical history is essential.

CPT Code(s): 86003 per allergen tested and if applicable 82785 IgE, Total Quantitative
